Cold Stand-by Restrictions. The use of the Program designated as a Cold Stand-by Program shall be restricted as follows: Each Cold Stand-by Program specified on an order shall be limited to the Machine running the operating system shown on the order, at a site shown on the order. A Cold Stand-by Program is a copy of a Program that is loaded, together with any corresponding data, onto a Machine in order to provide a Cold Stand-by for another copy of such Program then in use on another Machine (the "Production Copy"), where such data is replicated by Customer occasionally, and where the Cold Stand-by Program is not being accessed or used in production by Customer at the same time as the Production Copy. In the event of a failure of the Production Copy, Customer may access the data from the Cold Stand-by Program. The Cold Stand-by Program must be licensed for the same number of CPU's as the Production Copy.
